# Docker for Beginners

Day 5 – Docker on Nutanix

- Lucas Albuquerque -
lucas.albuquerque@nutanix.com

Docker on Nutanix

Docker on Nutanix

Nutanix DVP (Docker Volume Plug-in) Driver

➤ Normally, if a container is moved from one container machine to another, storage does not move with it.

➤ The Nutanix DVP enables Docker Containers to use storage persistently.

➤ ACS enables Docker deployments to be integrated with Nutanix external storage systems and enable data volumes to persist
